SALE LISTING WILL BE AVAILABLE ON OUR WEBSITE

• Over the past year my health has improved and our grandson, Matthew came back to the farm. He knows the herd as well as I do and with our grandson, Jordan we will Charge On To The Future! **Building O'Neill Angus to a New Dimension in the Angus breed.**

• Cattle that are: line-bred for consistency, combining pounds, carcass premiums, Docility, Longevity, Feet and Legs, and **designed to make a profit.**

Recently we have started testing our cattle through Quantum Genetix lab in Canada for the Q-Select Four Traits test. These tests indicate the presence of the Leptin genotype, the greater probability for higher marbling, cow longevity and milk production, and greater stress response with higher hot carcass weights. The cattle we've tested so far indicate the traits our commercial customers have found with O'Neill Angus Farm Genetics. Our cattle have an extremely high demand on the packer side and our customers have reaped the benefits. To us, this Real World Profit to our Customers is worth way more than any EPD or DNA test can achieve.

Actual birth weights on O'Neill Angus don't match DNA EPDs done by the American Angus Association. O'Neill Angus 2018 birth weights ranged from 65#-85#.
